CURRICULUM VITAE

PERSONAL INFORMATION	<p>Maria Lauriello Department of Biotechnological and Applied Clinical Sciences of University of L'Aquila. Via Vetoio, Coppito 2 L'Aquila, 67100, Italy, maria.lauriello@univaq.it</p>
CURRENT POSITION	<p>Associate Professor of Audiology</p>
<p>EDUCATION OTHER QUALIFICATIONS</p>	<p>1978-1979 High school graduation in classical studies (60/60). 29-10-1985 Degree in Medicine and Surgery with experimental graduation thesis titled "Some considerations about pathogenesis of effusive otitis media", achieved with honors at University of Rome "La Sapienza". 20-07-1988 Residency graduation with experimental thesis titled "Taste alterations in hemopathic patients", achieved with honors. 1992 After competition based on qualifications and examinations, appointed researcher for ENT at the Faculty of Medicine of University of L'Aquila. 30-09-2003 Research grant "San Raffaele H La Pisana" Rome in collaboration with the "Institute of Neurobiology and Molecular Medicine" of the National Research Council of Rome under the Scientific Direction of Prof. Sergio Bonini. 30-10-2004 Scientific collaboration contract "San Raffaele H La Pisana" Rome under the Scientific Direction of Prof. Sergio Bonini (October 30, 2004). 13-05-1993 Ph.D. with experimental thesis "Personal experiences about a comprehensive diagnostic rhinology protocol validation". From Academy Year 2005-6 Adjunct Professor at the Faculty of Medicine of University of Aquila. 01-04-20 Associate Professor of Audiology at Department of Biotechnological and Applied Clinical Sciences of University of L'Aquila.</p>
ACADEMIC APPOINTMENTS	<p>Since 1985 she has been a speaker at National and International Congresses and a lecturer in Courses on topics related to ENT, Audiology and Phoniatics. With regard to the area of research related to issues of Nasal Pathophysiology, ENT Semeiotics, Pediatric Otolaryngology, ENT Pathology and Therapy she carried out studies with intra-departmental, inter-university and international collaborations. The main research topics concerned the experimental highlight of the cyclic activity of the nasal mucosa, the development of a diagnostic protocol for the evaluation of nasal functions (rhinomanometry, MCT, dosage of IgAs), nasal hyperreactivity diagnosis (specific and not specific nasal challenge</p>

	<p>test), one-dose specific nasal immunotherapy, study of the rheological characteristics of nasal mucus (viscoelasticity, adhesiveness, spinnability, pourability), pH of nasal secretion in olfactory disorders, olfactometry, taste acuity tests, experimental obstruction of the Eustachian tube, relations between nose and Eustachian tube (MCT and tubal function, nasal pathology and middle ear otitis) changes in ICAM1 and ECP levels in nasal scraping following treatment with systemic immunotherapy or oral antihistamine for allergic rhinitis to Dermatophagoides, analysis of the deregulation of the cytokine network at the level of the Waldeyer ring during chronic tonsillitis, thalassotherapy, thermal therapy, bacterial internalization, bacterial biofilm, role of probiotics in the treatment of allergic rhinitis, association between vasomotor rhinitis and irritable bowel syndrome, results of the treatment of allergic rhinitis with a liposomal nasal spray containing vitamins A and E.</p> <p>With regard to Audiology and Phoniatics she carried out research projects mainly on speech disorders in childhood, rehabilitation procedures in deep hearing loss, protocols for learning difficulties, dysphonia in preschool, stuttering between 3 and 6 years old, evaluation of mood disorders in the diagnostic-therapeutic framework of functional dysphonia, introduction of music therapy, dance-therapy and theatre-therapy in the rehabilitation of communication and language diseases with particular regard to deep hearing loss, Terzi Space-Time Method in primary and secondary language disorders, method for the evaluation and stimulation of perceptual-auditory abilities in developmental age, questionnaire for the assessment of quality of life for children with bilateral neurosensory hearing loss aged between 6 and 12 years, relevance of Body Rhythmics in communication and language pathologies, stimulation of perceptual abilities by the Verbo-Tonal Method, correlation between female sex and allergy in patients with dysphonia, alternative and non-invasive therapies for the treatment of Meniere's disease, "The short hyperacusis questionnaire-SHQ" for the identification and measurement of hyperacusis in the Italian population affected by tinnitus, analysis of audiological characteristics and co-morbidity in patients with chronic tinnitus, role of parent training in communicative and linguistic development in children with cochlear implants, impact of the COVID-19 Lockdown on Patients with Chronic Tinnitus, development of a method for rehabilitation of primary and secondary language disorders.</p>
<p>CLINIC APPOINTMENTS</p>	<p>From September 1994 to the present</p> <p>Clinical activity at the "Centro di Audiofonologopedia" in Rome. The rehabilitation Centre is accredited by the Lazio Region and follows about 180 patients with a staff of about 40 speech therapists, 5 specialist doctors, and 2 psychologists, for the diagnosis and treatment of the following diseases: language and speech disorders, learning difficulties, cognitive disabilities, voice disorders.</p> <p>Since October 2007, the activity has been included in the rehabilitation process according to the "Quality Management Manual UNI EN ISO 9001".</p> <p>Since 6 November 2018, she was appointed "Health Coordinator" of this Centre where she is involved in the following tasks:</p>

	<ul style="list-style-type: none"> • Basic assessment and take-over proposal • Review of the Initial Assessment • Classification of pathologies according to ICD-9/ICD10 codes and of the functional conditions according to ICF (as required by the Lazio Region) • ENT Examination • Audiometric and impedance tests • Evaluation of the patient's medical history • Initial Project Proposal in collaboration with other members of the Rehabilitation Team • Monitoring of the progress of the Rehabilitation Project and of the correct filling of the Rehabilitation Medical Record in all its parts • Counseling for the patient or his/her parents • Weekly briefing meetings with all health professionals for the discussion of clinical cases, for follow-up meetings and for planning organizational issues • Functional diagnosis in collaboration with other members of the Rehabilitation Team • Clinical-rehabilitative report in collaboration with other members of the Rehabilitation Team • Review of the Final Evaluation • Discharge of patients in collaboration with other members of the Rehabilitation Team.
<p>TEACHING EXPERIENCE</p>	<p>Since 1992, Teaching Activity at the School of Medicine and at the DISCAB:</p> <ul style="list-style-type: none"> • ENT for Degree in Medicine and Surgery • Audiology for Degree in Medicine and Surgery • ENT for Degree in Dentistry • ENT for Degree for Nurses • Audio-prosthetic Sciences for the second cycle Degree in "Technical Sciences of the Health Professions" and in "Diagnostic Sciences of the Health Professions" • Audiology for Degree in "Prevention of the Health Professions" • Audiology for Degree in "Therapist for Neurology and Psychomotricity of Developmental Age" • Audiology for Degree in "Speech Therapy" <ul style="list-style-type: none"> ○ Phoniatics, ENT, Nose and Paranasal Sinuses Diseases, Hearing Diseases for ENT Residents ○ ENT and Geriatrics Audiology for Geriatrics Residents ○ Clinics and therapy of ENT diseases with immunological pathogenesis for Allergology Residents ○ Phoniatics and Speech Therapy for Maxillo-Facial Surgery Residents ○ Phoniatic Semeiotics, Audiological and Phoniatic Rehabilitation I and II, Phonetics, Psycholinguistics, New-born and Child Audiology, Ear Pathology, Clinic of the Phonatory Apparatus, Phoniatic Pathology, Phoniatic Rehabilitation, Applied Medical Techniques for Audiology Residents

	<ul style="list-style-type: none"> ○ ENT for Child Neuropsychiatry Residents ○ Phoniatics I and II, Speech Therapy I for Speech Therapist School ○ Phoniatics for Audiometry School ○ General and Special Speech Therapy for Psychiatric and Psychosocial Rehabilitation School. ○ Board of Examiners for the admission to the medical profession ○ Proposer of Degree Theses ○ Teacher and Secretary of the Master Class for Speech Therapist at the University of L'Aquila.
<p>RESEARCH ACTIVITIES</p>	<p>Authors of 304 publications, mainly about:</p> <ul style="list-style-type: none"> - Nasal Physiology (cyclic activity) - Nasal Semeiotics (rhinomanometry, MCT, slgA dosage) - Nasal Pathology (allergic rhinitis and aspecific hyperreactivity) - ENT Semeiotics (olfactometry, gustometry) - Paediatric ENT (maturation of rhinopharyngotubaric unit) - ENT pathology (chronic tonsillitis, thalassotherapy, thermal therapy, bacterial internalization, biofilm, probiotics). - Otology (OME pathogenesis), <p>Audiology and Phoniatics (language diseases, hearing loss, learning diseases, voice disorders, stuttering, development of a method for rehabilitation of primary and secondary language disorders.).</p>
<p>EDITORIAL BOARD, EDITORIAL ACTIVITIES, SOCIETY MEMBERSHIP</p>	<p>Fellow of the Italian ENT Society (S.I.O.). Fellow of the Italian Audiology and Foniatics Society (S.I.A.F.). Secretary-Treasurer of the ENT University Association (A.U.O.R.L.), since 2002.</p>
<p>SCIENTIFIC ACHIEVEMENTS BIBLIOMETRIC INDICATORS</p>	<p>Scopus Author ID: 6603032838 http://orcid.org/0000-0002-9936-1791 Hirsch (H) Index 16 Scopus</p>
